

EZY LODEC

CAS Truck Scale Solution, EZY LODEC

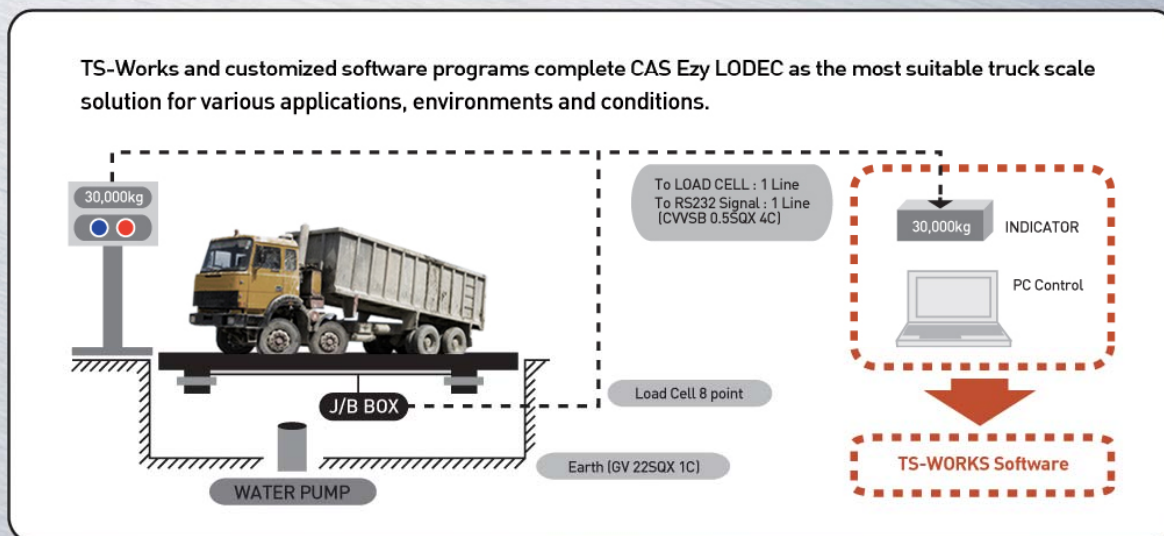

Designed with a modular system for easy assembly and efficient shipping. Its galvanized structure perfectly fits to various field conditions.

FEATURES

- **Easy installation**
 - Module Structure Assembly System.
- **Efficient delivery to any continents**
 - 2 sets of 3 x 18 m structure can be loaded in one 20ft container
- **Both Pit and Pit-in types are available**
- **The most slim Truck Scale in the world (200mm)**
- **Equipped load-cell: WBK series**
 - OIML Certification
 - Anti- Lighting System
 - IP68 Protection Class
 - Stainless Steel Body
 - Ex ia IIC T6 (Korean Industrial Safety Certification)

Complete Weighing System

EZY LODEC | TRUCK SCALE

Galvanized Structure

Galvanized body structure of EZY LODEC offers a reliable truck scale solution to customers.

Total Protection – With galvanizing, the whole structure gets in contact creating an entire protection preventing rust and corrosion, including areas where with other type of process should be inaccessible.

Effective Maintenance – Galvanized coating will prevent shrink or crack because it is metallurgically bonded to the steel. It also offers superior resistance to abrasion and water.

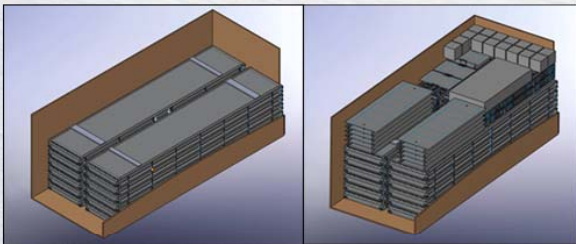

Lowest Cost – Galvanizing is almost invariably more cost effective in the long term because it lasts longer and needs less maintenance.

Module Structure

Module Structures of EZY LODEC expands its application. By only assembling a pair of extra deck modules, the length can be extended to 5~6 meters (or more) and vice-versa.

Efficient Shipment

CAPACITY

- 40 ton
- 60 ton
- 80 ton

DIMENSION

- 3m x 5m – 5 ~ 6 sets per container
- 3m x 6m – 5 ~ 6 sets per container
- 3m x 10m – 2 sets per container
- 3m x 12m – 2 sets per container
- 3m x 15m – 2 sets per container
- 3m x 18m – 2 sets per container
